

# WHERE DESIGNS MEETS SIMPLICITY.

Its not about designing pretty web sites anymore. Its all about creating a hybrid solution that's both visually and contextually rich as well as easy to use for anyone who comes to your web site. This is a focal point of development that Dupergraphics have been driving over the past four years. Our existence has a two fold purpose which is to help you get the right web site for your organization and, if you already have a web site, provide you with additional information so that you can tune up and streamline your site.

**Cycle Of Services**

We have been designing and developing web site solutions for four years now anything from small five page web sites to database driven dynamically fluid multi thousand page / product web sites.

Depending on the size of the website that you choose to have, Dupergraphics can create and upload your website to the internet within a minimum of two (2) weeks

We also provide a one-stop solution for registering domain names and hosting your website. This will allow you to have all of your company needs centralized to one location.

Services Provides are as follows: Web Design, Web Re-Design, Graphic Design, Macromedia Flash Solutions, php Bulletin Board Communities development, Form and Database development, Audio Conversion, Maintenance (Hourly and Monthly), 24-48 Request Turnaround, 24 Hour Access, Web Hosting, Domain Registration, and eCommerce solutions.

**DUPERGRAPHICS**  
**DUPERHOSTING**

**Your #1 Solution for Web Design and Hosting**

# WEB DESIGN PACKAGES AND PRICES

There will be times when your customers demand more from a web site than just static information. Whether you need to pull customer records on the fly, allow your clients to update their information, give price quotes with the most up to date information, or carry out other real time computations then you will need web applications developed and integrated into your web site.

# Our Clients and Portfolio

Our advantage is derived from our missions critical focus which is to satisfy our clients by meeting their costumers needs and expectations. We have witnessed a serious shake-up in the internet industry. Many web sites went bankrupt and it wasn't because of poor products or services. At times lack of capital killed them. In other instances the lack of proper navigational structure, frustrating web site usage, poor security as well as poor information architecture drove the final nail.
